

MIDAS DEAL CLOSED

The Long Pending Transaction is Concluded.

NEW COMPANY FORMED

JOHN DERN AND OTHERS ARE IN IT.

Incorporated For \$200,000 and Will Proceed at Once With the Erection of a Mill On the Property—Both Sides Talk of South Swansea—Four Aces Trouble.

The option on a two-thirds interest in the Midas group of claims in Clifton Mining district, Tooei county, which has been held for the past eighteen months by James Chipman and John Dern, was yesterday taken up by the parties and a deal was struck to the entire property was delivered to the Midas Gold Mining & Milling company for a consideration of \$50,000. The option of Messrs. Chipman and Dern was secured from W. H. Grant and during the life the three named, together with Mrs. Elizabeth Crismon, have spent \$11,000 in developing the mine. The property consists of the Midas, Lucky May, Golden Eagle and June Bug mining claims, embracing eighty acres in all. After the taking up of the option yesterday the Midas Gold Mining & Milling company was incorporated for \$200,000, with 400,000 shares of a par value of 50 cents each and 100,000 shares were set aside as a working capital. The directors of the new company are John Dern, W. H. Grant, James Chipman, Jr., and Mrs. Elizabeth Crismon. John Dern is president, W. H. Grant, vice president and James Chipman, treasurer. After the selection of Washburn S. Chipman as secretary, the new company was declared formally launched and the incorporators adjourned.

When seen after the meeting, Mr. Dern said that during the past year and a half he and his partners had brought to a splendid stage of development and the expert examination and sampling by L. U. Colbath last spring, as well as the examination made by himself and James Chipman had been very satisfactory indeed.

Recent measurements made in the mine, Mr. Dern said, showed that over 100,000 worth of ore had been sampled better than \$3 to the ton in gold had been blocked out. The ore has been tested both at the Mercer mill and the McIntosh-Forest plant at Denver, and both went to show that in the Midas they had a perfect cyaniding proposition.

On that showing the management of the company will take immediate steps for the erection of a mill with a tankage capacity of 150 tons, and as wood, water and timber in sufficient quantity for both mine and mill purposes are near at hand, the Midas company will unquestionably make a stir in the Deep Creek country during the next few months.

The closing of this long-pending deal and the formation of such a strong company will be a source of gratification to every claim owner in the district, as it will undoubtedly greatly stimulate future developments in the district, to say nothing of the good effect it will have in determining the Southern Utah country as a whole with its contemplated new road.

SOUTH SWANSEA-FOUR ACES.

Both Sides Make a Statement to the Herald.

(Special to The Herald.) Robinson, Oct. 18.—Your correspondent visited the South Swansea and Four Aces mines this afternoon and interviewed both managers with reference to the alleged trespass. At the South Swansea mine, Mr. John E. Smith, president, was seen. When interviewed by the writer concerning the threatened trouble, J. E. Smith said: "The situation may easily and quickly be summed up in four words, to wit: We have been satisfied that the Four Aces people have been working in our ground. We could plainly hear the men at work, and we determined to drive a drift toward them and stop further work, which we did, and erected a bulkhead. We made up our minds that we could not permit them to work on our ground any longer, if cognizant of it without protesting, because, according to our views, if the law will permit them to continue work where they are now extracting ore it looks as if there would be no way of stopping them from working through all of our ground. So we are in transit to drive a drift toward them to maintain our property, and whatever action is brought must be instituted by the other people. That is our case in a nutshell."

Following an interview with Mr. Wheeler, the writer saw Thomas E. Cole, resident manager of the Four Aces. Mr. Cole said that during his absence from the mine a workman of the South Swansea had broken into their ground and had erected a bulkhead, which had given them temporary possession. He said further that had he been present he would undoubtedly have denied the right asserted by the South Swansea people. He said he would have, if necessary, resorted to force in defending his company's rights.

He said he had reported the proceedings to Mr. Lee in Salt Lake City, who gave him instructions. Mr. Cole expressed himself as being absolutely confident that if the case comes to a trial in the courts his company will win, hands down, and that he firmly believes the South Swansea people have extracted great bodies of ore from the Four Aces vein, and if they are now obtaining ore of either the old or new shaft the mineral is still coming from the Four Aces.

He also said that the vein runs almost parallel, and that the apex of the Four Aces can easily be seen cropping out 200 feet east of the new shaft where the South Swansea, south of which point the incline shaft on the Four Aces was commenced and sunk on mineral. Mr. Cole asserted with emphasis that in an interview with Mr. Lee, published in the Salt Lake Times of today, that Mr. Lee was incorrectly reported as saying that the Four Aces had crossed over west more than 200 feet, a statement that the Four Aces had not made under any circumstances because from the moment the shaft was sunk at the surface they had never crossed over from north had they been out of the vein a foot "Westward" on one side. I firmly think we can easily establish the right to follow our vein, and that is all the privilege we claim," Mr. Cole concluded.

MINERAL WAX MINE. Max Sohr Will Ship the Product to Germany.

One of the results of the late trip taken abroad by Max Sohr was the formation of the American Oakerite company, which has undertaken the development of the oakerite or mineral wax claims near Soldier Summit.

From Mr. Sohr it was learned that the company is preparing to put up some new buildings at the mine, including a boarding house and a refinery. Mr. Sohr says the product can be used for all purposes where wax is utilized. Although it is of a dark color when it comes out of the ground, he says it can be changed to almost any color desired. The crude wax is found in the deposits about Soldier Summit in a vein which averages about twelve feet in thickness. The

first-class material runs about 55 per cent live, while the lower grade stuff is from 15 to 25 per cent pure. A market will be found in Germany. Mr. Sohr says for the entire output of the refinery. L. S. Dean, left for the mine yesterday with a force of men to begin exploratory work.

OPERATIONS IN MERCUR.

George H. Dern Reports On Some of the Big Mines.

George H. Dern, after spending a couple of days in the big gold camp, was again at the desk in the Mercer offices yesterday. Everything at the Mercer mine, he said, was again in smooth running order. The repairs to the big air compressor, in which a new piston head has just been placed, are completed, and the huge machine is again in operation. A new 200-ton hoist, being constructed on the Little claim, one of the Mercer group, from which to help supply the mill with ore when the new tanks are put into commission.

At the Dalay all possible speed is being made on the new mill, on which the entire force from the Mercer mill has been employed to hurry the work along, and within the next day or two the elevators will have been finished and the plant started up. As soon as that happens the whole force will be sent out to the Mercer mill's new claim, and that work resumed to completion.

The Geyer-Marion, Mr. Dern says, is now working to its full capacity, and the mine is looking better than at any time since early last spring. The mine is doing more and better work than ever, and a greater per cent of the values in the ore is being extracted, and everything looks very encouraging for the future.

The Silver Lode company, which has just opened into the vein with its 300-foot tunnel, is rapidly getting up the value of its mine. The assay values of the ore have increased from \$1.30 to \$2.20, and returns which are due today, Mr. Dern is convinced, will show the values to be increasing as depth is obtained.

ABOUT DALTON & LARK.

Believed Something New Will Develop On Mr. Whittemore's Return.

As nothing has been reported by C. O. Whittemore regarding the failure of the Dalton & Lark deal, he went to New York to consummate it, it is believed that on his return, which is scheduled for tomorrow, it will be found that Mr. Whittemore has not abandoned the scheme of handling the property by any means. The fact that the old option has expired and the mine has again been handed over to Mr. Schenck will not, it is thought, deter Mr. Whittemore from his purpose of landing the prize for his eastern clients.

After the option expired, Mr. Schenck said he did not feel disposed to take advantage of any technicality which might have upset Mr. Whittemore's plans, and as it was quite plain from what Mr. Schenck said that a belated acceptance would have been considered by him, the conclusion is drawn that it is not yet too late for the deal to go through.

P. T. Farnsworth, who has been directing development work under the option, stated yesterday that on his trip to the mine, which was on Tuesday the mine had been inspected and everything was found to be in splendid shape. Before leaving, Mr. Schenck had arranged with Mr. Whittemore a continuance of the active campaign which has been in progress during the past six months.

TWO NEW COMPANIES.

Articles Filed For Mining and Milling Corporations.

Articles of incorporation for the Posey Mining & Development company were filed in the office of the secretary of state yesterday. The main offices of the company are in Ogden and the incorporators are citizens of Weber county. The capital stock is \$50,000, divided into 500,000 shares of the par value of 10 cents each. John E. Smith is president, Daniel A. Murray vice president and James H. MacMillan secretary and treasurer. The other directors are Eugene Posey and Herbert R. MacMillan. The company owns the Grub Stake Nos. 1 and 2 in Three Mile canyon, Willard mining district, Box Elder county.

Articles for the Midas Gold Mining & Milling company were filed in the county clerk's office. Details of the incorporation appear elsewhere.

RED WING MILL.

Will Be Ready to Start Up Within a Few Days.

Manager G. A. Duncan came in from Bingham Tuesday evening where he spent some time in making observations at the Red Wing mill.

Mr. Duncan expects the mill started up again after a few days. Considerable delay has been experienced in getting the plant in operation on account of the failure of certain machinery to arrive which was ordered some time ago and which will be utilized in increasing its capacity.

Speaking of conditions at the Bingham and Chloride-Potosi mines of Mercer, Mr. Duncan says good results are being accomplished. During the first half of the present month 3,500 tons of ore was treated, the cost of extraction being reduced to a minimum. If no mishaps occur before the end of the month Mr. Duncan expects to make October a record breaker.

YOUNG AMERICA MILL.

Charley Ford Employed to Look After Its Construction.

The Young America Mining company expects to begin the erection of a new ten-stamp mill at its Tuscarora, Nev., mine at once.

The services of Charley Ford, the well known mill builder, have been secured and he will leave for the west today and upon arriving at the mine will begin his work by establishing the grade upon which the new building will be erected.

The plans for the building have all been completed, and after a few alterations to be made after Mr. Ford makes his report, have been approved by the management of the mine.

A part of the machinery has arrived and the balance will be on the ground some time next week.

ORE FROM MAMMOTH.

Heavy Shipments Being Made—A Dividend Expected Tomorrow.

Sam McIntyre, manager of the Mammoth mine, has been in Tintic for several days this week and has been hurrying some heavy shipments of ore to market.

It was learned from authentic sources yesterday that the ore body on the 1,300 level is showing up splendidly and a great deal of the ore coming into market at this time comes from that part of the mine. A shipment of seven cars came in yesterday.

The directors of the company are scheduled to hold their regular monthly meeting tomorrow, when it is almost certain another dividend of 10 cents a share, or \$40,000, will be paid.

RICHNESS OF LION CON.

Ore Sampled Yesterday Gave Some Big Returns.

Some samples of ore brought in from the Lion Consolidated of Stockton, by J. A. Brown, were assayed yesterday and the returns proved to be most gratifying. Four tests were made of the high-grade ore and they showed an average of 52 per cent extraction, 45 ounces silver and \$1.20 in gold.

The ore considered to be a fairly good milling material proved to be of a better grade than was expected. Several tests were made of it, which

Lamps to Burn, 20 cts. to \$20.

GREAT LEFT OVER SALE

grave returns of 27 per cent lead, 14 ounces silver and \$1.50 gold.

It has not been determined just how extensive the ore bodies exposed in the mine are, the shaft is all in one, neither wall being exposed.

DEWEY MINING COMPANY.

Name of a New Corporation For the Tintic District.

H. B. Cole, W. C. Green and William Childs, the latter of Boston, are all admirers of the nation's hero, George Dewey. They could not be in attendance at the reception given the great admiral in New York a few weeks ago, but they intend to shower more glory upon him by choosing his name as the title for a new mining company soon to be organized to develop a promising group of claims in the Tintic district.

The property is located near the Lily mine and is developed by a shaft sixty-five feet deep, aside from several drifts and claims. The ground covers three full claims.

The new company will be styled the Dewey Mining company and will be incorporated for 500,000 shares, two fifths of which will be placed in the treasury to be sold for development purposes.

TUSCARORA STRIKE.

Demonstrates the Continuity of the Dexter Veins.

Colonel S. B. Milner, who is heavily interested in the property of the Tuscarora Gold Mining company is of the opinion that the strike of high-grade ore made in that property a short time ago is one of the most important developments made in that gold camp this year.

The disclosure practically demonstrates that the series of north and south veins, running from forty to 500 feet apart, are continuous and proves beyond a doubt that they exist outside of the ground owned by the Dexter, Tuscarora and Tuscarora Gold properties.

In sinking the Tuscarora shaft about eighty feet of wash was passed through before striking the solid formations. The shaft was continued on seventy feet further from which point a drift was run out for a short distance encountering a vein of ore about eighteen feet in width. In this vein is a large amount of good milling ore, while a small streak carries values of \$25 to the ton.

Deep Snow at Marysville.

J. A. Odbert, the well known mining man operating in the Marysville country, came up from the south yesterday and will remain for several days. He says the fall of snow is heavy in the district and it is claimed it is as deep in the mountains now as it was any time last winter.

Prospectors have been driven out of the hills and it is almost impossible to get up to where the Wedge mine is located.

Ore and Bullion.

Ore and bullion settlements in this city yesterday amounted to \$22,500. T. R. Jones & Co. being the only firm to report, as follows: Ores, \$10,000; bullion, \$12,500.

Metal Market.

Silver, 57 1/2 per ounce.
Lead, \$4.40 per 100 pounds.
Copper, 17c per pound.

Mining Notes.

John J. Daly has returned from a trip to Park City.

C. H. Schenck is expected home the first of next week.

R. G. Wilson was in Tintic yesterday on mining business.

The Sunbeam mine reported with three cars of ore yesterday.

Superintendent Ware of the Swansea mine was in the city yesterday.

Robert E. Warren has come to Idaho to attend to some mining business.

General Superintendent C. E. Allen of the Centennial-Bureka is in Tintic.

H. L. J. Warren has been in Mercer for several days on mining business.

Gill S. Peyton is expected home from Boston and New York the first of next week.

The Conklin Sampling Works received ten cars of ore from Tintic yesterday.

Dr. P. S. Keough is in the east interesting some of his friends in the Gypsy Blair mine.

T. E. McConaughy was in Bingham yesterday in the interests of the Congor company.

A contract has been let for 100 feet more development on the Free Coinage mine in Big Cottonwood.

F. A. Dunham, of the Bowers Extension Mining company has returned from a business trip east.

The Taylor & Brunton Sampler received two cars of ore yesterday from Bingham and one from Big Cottonwood.

It is reported from Marysville that the owners of the Wedge mine are preparing to send out another shipment of high-grade ore.

Word was received yesterday from New York that E. E. Jenkins and wife, Joseph J. Daynes and Frank J. Cannon had sailed for Europe.

Charles Read, who is pushing development work on the Hillside mine, adjoining the Mercer and Macramont, has returned from a trip to Tintic camp.

Arrangements have been completed to place the stock of the Gypsy Blair Mining company, recently incorporated, among those listed on the Salt Lake Stock Exchange.

H. H. McIntyre, after spending a fortnight in gathering up several meritorious mining propositions in Utah to present to his eastern clients, has returned to Denver. He expects to return in about ten days.

G. A. Clark, the well known Butte attorney, arrived in the city yesterday morning and took his departure last evening for Tintic where he has gone in the interests of Franklin Parrel, who has extensive mining interests in that camp.

Lamps to Burn, 20 cts. to \$20.

MINING STOCK MARKET

Yesterday's Sales Were Light and Market Was Featureless.

GRAND CENTRAL WEAKER

DAILY-WEST FOUND BUYERS AT \$12.55.

Petro Still Remains in a Weak Condition—Remains as a Puzzle to Many—Value Held at Strong Prices—Four Aces Went Lower—Closing Quotations and Sales.

The mining stock sales were light yesterday and the market was void of any features.

Grand Central opened at \$5.00 and declined to \$4.45 at the close. Bullion-Bock entered in good order and buyers were anxious at prices ranging from \$3.32 1/2 up to \$3.50. Daily-West participated, fifty shares selling at \$12.55, while Daily-West sold at strong prices, only one sale being made, and that at 34 cents.

Petro continued weak and recorded no improvement over the previous day's sales. It is still a puzzle to a good many why it is that the stock is held at such low prices, when the mine has been paying dividends for several months of 2 1/2 cents a share. Inset found buyers at 9 cents. Sunbeam reached 40 cents, but Four Aces fell down to 10 cents a share.
